

المواصفات الفنية والكميات المطلوبة للأجهزة الطبية الخاصة بالأمراض غير المعدية في مراكز الرعاية الأولية في وزارة الصحة

No.	Item	Item Price \$	Quantity	Total estimated Price \$
1	Sphygmomanometer (mercurial)	30	150	4500
2	Sphygmomanometer (electronic)	50	30	1500
3	Tactile Sensitivity evaluator (Monofilament)	10	100	1000
4	Medical Scale (Weight& height)	200	20	4000
Total Cost (\$)		11,000		

Item no.1

Mobile Blood Pressure, mercury

Functional and Technical Specifications:

- It should be Heavy Duty & Well-Known Brand Name.
- Mobil type Sphygmomanometers
- Velcro cuff (14*15cm) with latex bag
- Bulb with valves.
- Measurement rang . 0—300 mm hg
- Mercury purity 99.99%
- Glass tube 3 cm (I.D) * 320 mm
- Stand shaft flexibility range 350 mm
- Complete with all accessories and ready for use.
- Should be provided with adult arm cuffs of size medium, large and pediatric cuff.
- Warranty one year from date of acceptance.

Item no.2

Digital blood pressure

Functional and Technical Specifications:

- It should be Heavy Duty & Well-Known Brand Name.
- Display: at least 5" LCD digital display
- Measuring method: pulse scanning/oscilloscope assay
- Pressure range: 0-280mmhg
- Pulse range: 30-200 times/min
- Accuracy: Pressure ± 3 mm Hg and Pulse; ± 5 %
- Power Source: AA size X4
- Ready to use with all standard accessories' adult and pediatric cuff each Q2
- Warranty one year from date of acceptance.

Item no.3

**Touch-Test Sensory Evaluator Size 5.07 (10 Grams). MFID:
NC12775-14**

Used to Evaluate both Diminishing and Returning Sensation.

NC12775-14: Touch-Test Sensory Evaluator Size 5.07 (Indicates Loss of Protective Sensation)

Use these evaluators to test sensory levels and obtain objective data for accurate reporting on the status of diminishing or returning sensibility. Touch-Test Sensory Evaluators are individually calibrated within a 5% standard deviation of a predetermined level of force. The monofilament bends when peak force threshold is reached.

The unique handle easily opens to a 90 degrees angle for testing. When closed, the Sensory Evaluator can be carried safely in a pocket or carrying case, protecting the monofilament when not in use. Finger indentations on the handle provide a firm, comfortable hold. The Sensory Evaluator handles are marked with the corresponding color-coded pressure level.

Evaluation results can be recorded on the Hand or Foot Screening Forms (NC12750-1 and NC12749), sold separately. Thresholds include normal sensation, diminished light touch, diminished protective sensation, loss of protective sensation and deep pressure sensation only.

Available in a 5 Piece Hand Kit, a 6 Piece Foot Kit and a 20 Piece Full Kit. Each kit comes in a protective case.

These portable sensory evaluators are calibrated to within a 5% standard deviation of each target force.

Item no.4

Adult/ pediatric (weight & height) scale

- Good brand name manufactures well-known brand name with good reputation
- Electronic body-weight scale
- Weight range: up to 200 kg
- Mi. Value per division: 100 g
- Auto Shut-off After 2 Minutes
- Display resolution adult 0.1 kg and infant 0.01 kg
- Scales to be highly accurate and stable.
- Height range to be measured: 40 – 190 cm
- Mi. Value of height per division: 0.5 cm
- Display: LED
- Power: AC/DC
- Steel structure
- All standard and safety certificates should be included
- New catalogue is attached with the offer.
- Warranty one year from date of acceptance.
