Project number	2021/110			Date:	13/9/2021			
Project name	Improving the quality of health services provided at the Sabha Al-Harazin Center of the Ministry of Health – Gaza.			Applicant for the project				
Project duration in months	12 months		Type of project		Within the plan Urgent			
Project field		Construction		Rehabilitation		Machines & Equipment		Therapeutic Services
		Consumables		Training and Scholarship		Operational Expenses		Others (...)
Implementing body	Ministry of Health			Project Partners				
Beneficiaries	The people of the area is about 90,000			Place of implementation	Sabha Al-Harazin Center			
Estimated budget (USD)	150,000 USD (One hundred fifty thousand US dollars).							
Summary of the project (Overview of the project idea and requirements to solve the current problem)	<p>The project aims to provide safe and high-quality primary health care services to the people of the Gaza Strip through the establishment of a model primary health care center in Al-Harazin Health Center, to practice family medicine within the family medicine team consisting of doctors, nurses, pharmacists, radiology technicians and laboratory technicians, who will be trained in the center. The project will be implemented in three phases. The first phase includes equipping the Sabha Al Harazin health center with medical devices and equipment, as well as medical and non-medical furniture, in addition to equipping the infrastructure and logistics in the center. The second phase will also include training all staff working in the center in the field of family medicine, focusing on doctors and nursing. Also, the second phase will include health awareness for the community through the area committee. In addition, the center will be provided with drugs and medical consumables. At this stage, the package of health services that will be provided through the center will be specified, along with reviewing and updating the guidelines. While the third phase will include completing the computerization of other health services in the center. This model will implement in other health centers in the future. Primary care is the keystone of any health system, and the strength and efficiency of the system depend on the strength of primary health care.</p> <p>Sabha Al Harazin Center is a level 4 health center that provides universal primary care services and a training center for the Palestinian Board of Family Medicine Program.</p>							

	<p>The number of employees reached 48 employees and they provide health services to the residents of the Al-Shuja'iyah area, which has a population of 120,000 people, where the average number of visitors reached 300 cases per day, and the center operates during the morning shift daily. The center provides primary care services such as family medicine, NCDs, mother health, oral and dental health, emergency, laboratories, radiology, nursing services, in addition to dispensing medicines.</p> <p>Family Medicine is a specialty of "family practice" of great importance because it provides continuous and comprehensive health care for the individual and family of all ages and genders. The family practice team includes a group of health care providers who have the best knowledge of the health and life conditions of all family members; Therefore, the team knows better how to implement preventive health interventions including health education and other promotive, preventive, curative, rehabilitative and palliative health services. Therefore, Sabha Al-Harazin Health Center needs to provide these services to the people of the region, especially since there is a steady population increase in the population, and the population needs integrated health care in family medicine to improve their health status through the family practice team, so this project comes to meet the needs of family medicine in a health center Subha Al Harazin; The estimated cost of the project is one hundred and fifty thousand US dollars.</p> 
<p>Project justifications</p>	<ul style="list-style-type: none"> ✓ The lack of a family practice team to provide integrated specialized services in primary care centers of the Ministry of Health. ✓ The need to train the workforce in health centers in family medicine. ✓ The steady increase in the population of the Gaza Strip. ✓ Society needs health awareness, and family medicine focuses on health awareness, changing behavior, and taking preventive and promotional measures for members of the community.
<p>Project objectives</p>	<p><u>Overall goal:</u></p> <ul style="list-style-type: none"> ➤ Contribute to providing safe, integrated, and high-quality health services to the population in the Gaza Strip through the implementation of Model PHC Center for family practice in the Sabha Al-Harazin Health Center. <p><u>Specific objectives:</u></p> <ul style="list-style-type: none"> ➤ Ensuring continuous and comprehensive health care for all family members ➤ Improving access to health care services by community members ➤ Building family practice teams through continuous training to ensure the provision of integrated specialized services in primary care ➤ Ensuring that community members have access to a specific package of health services. ➤ Reducing the patient accumulation at the secondary or tertiary level and ensure that there is enough time for the patients who need to be treated at the secondary and tertiary levels.
<p>Current indicators</p>	<ol style="list-style-type: none"> 1. Lack of trained medical staff in family medicine. 2. Lack of facilities and equipment to practice family medicine.

<p>Expected indicators after implementing the project</p>	<ul style="list-style-type: none"> ✓ An improvement in the quality of health provided in Sabha Al Harazin Health Center. ✓ Easy access to a package of integrated health services. ✓ Acquisition of the medical staff with skills and knowledge in the practice of family medicine. ✓ Increasing patient satisfaction with the health services provided at Sabha Al Harazin Health Center.
